

Made in Germany

**VIDEO-function** ► [www.pincoder.net](http://www.pincoder.net)

Set on the advertising-side (above) with the 4 number-discs from left to right an 'unforgettable' 4-digit key-number (Ident. Password) as for example **0816**. This number is from now on your '**MASTERCODE**'.

Also für 5-  
to 8-digit PIN

Now write down with a ballpen on the function side (above), from left to right – like writing in a notebook – your 4-digit PIN such as **4903 EC** for EC-Card, to name an example.

**5- to 8-digit PIN** are entered over two neighbouring rows, as for example **6125 08** for a 6-digit PIN. Then enter into the remaining two blank ovals any numbers of your choice.

**In case you have more than 4 PIN** please turn over the 4 number-discs four spots and use the lines to follow for further PIN. Once you have entered all of your PIN fill in all empty ovals with any numbers of your choice using one and the same ballpen.

**VARIABLE MASTERCODE**

Varying the key-number over the three levels increases the 4-digit variations up to 810 000.

**Your PIN are encrypted – similar to a combination-lock – by moving the four number-discs. Setting the 'Mastercode' makes visible all encrypted PIN.**
